

PROJECT PLAN B SUBMISSION

Project Plan Submission for Watch Your Back (part B)
COMP30024 Artificial Intelligence 2018 Semester 1

Marie-Laurence Godinot (972397) <mgodinot@student.unimelb.edu.au>
Jason Sean Pursey (637551) <jpursey@student.unimelb.edu.au>

1. Sharing the workload of this project

Marie-Laurence is still learning Object-Oriented Programming and is consequently struggling with this new tool, whereas Jason feels really comfortable with it. That is the reason why Marie-Laurence will focus a bit more on the comments and analysis whereas Jason will focus more on the code. However, we will share the coding workload.

2. Communicating about the project

- We have agreed on weekly meetings before Tuesday lectures: we will work for two hours from 2pm to 4pm in the law building. This will help us move forward in the project and keep ourselves aware of what the other one is doing.
- We have planned to use GitHub for our work: this tool will help us work simultaneously on the project without having to be physically together.
- We also use Facebook to keep ourselves briefly posted.

3. Upcoming deadlines for other subjects

- 18 April: project plan B submission, 4.00pm
- 19 April: homework 2 in "Introduction to biomechanics" (Marie)
- 23 April: Phase 2 in "Elements of Data Processing" (Jason)
- 30 April: assignment in "Australia now" (Marie)
- 08 May: Phase 3 in "Elements of Data Processing" (Jason)
- 11 May: assignment 2 in "Biomedical Engineering Management" (Marie)
- 11 May: due date for part B, 4.00pm
